EVERGREENS

Prices are for Evergreens Securely Balled and Burlapped

Can dig Evergreens, roots puddled at the following reductions in price:

12 to 18 inches at 12½c. 18 to 24 inches at 15c. 2 to 3 feet at 20c.

Our Evergreens have all been three times x x x transplanted, having been grown with plenty of room for development. Have been properly sheared and pruned for producing compact, symmetrical specimens.

Evergreens selected and marked by customers in the Nursery field will be charged for in accordance with their value, and prices named in this list will not govern.

We do not guarantee Evergreens to live and will only make adjustments when complaints are filed promptly upon receipt of shipment.

Height specified after botanical name indicates height tree should obtain at maturity.

Goodrich Rubber Budding Strips

Indications of an increased amount of propagating this year and higher labor costs make it more important that you consider the advantages of Goodrich Rubber Budding Strips.

The life of both the red and gray strips has been increased so that they will last a minimum of 30 days in hottest weather, but disintegrating fast enough to eliminate the risk of harmful pressure being exerted at any time. And the new red strips run appreciably more to the pound.

RECOMMENDATIONS. The No. 1 Gray is used for budding small stocks, and for winter bench grafting of roses and evergreens. Nos. 5 Gray and 4 Red are used for summer field budding of roses; and Nos. 1 and 4 Gray and Nos. 4 and 5 Red for fruit trees. The No. 424 Light Weight deteriorates more rapidly than the standard No. 4 Red.
